

NewMind EPS Research Workshops

17th and 20th November, 10am-4pm

Dearing Building, Jubilee Campus, Nottingham University

17th November: Information Management & HCI

20th November: Sensor Systems & Data Analytics

The workshops will provide an opportunity for EPS researchers to understand some of the challenges identified by mental health professionals and patients:

- Exploring how they might be addressed with technology interventions,
- Helping to develop a roadmap of critical underpinning EPS research.

Each workshop will focus on two technology areas. The roadmaps developed in these and future workshops will feed-in to EPSRC’s Healthcare Technology programme.

Agenda

10-10.30	Registration and networking
10.30-11.00	Introduction Scene setting: desired outcomes of interventions
11.00-12.00	Brainstorming Interventions Mixed breakout groups to generate ideas for challenging interventions that would address the desired outcomes
12.00-12.30	Plenary Report-back from breakout groups
12.30-13.00	Working lunch
13.00-14.00	Developing Intervention Ideas Breakout groups to develop the intervention ideas in the context of a particular technology area
14.00-14.30	Plenary Report-back from breakout groups
14.30-14.50	Tea and Coffee
14.50-15.50	Developing the Research Roadmap Breakout groups to explore the research challenges that need to be addressed to underpin intervention ideas
15.50-16.00	Next Steps & Closing remarks
